Title:	Uncommitted Reserve Balances

Council at its meeting held on November 29, 2018 requested administration to report back to Council on the uncommitted reserve balances. This report provides the information requested by Council.

The attached Schedule details the movements in the County's established reserve accounts. The total uncommitted reserve balance as of November 28, 2018 is \$15,549,801. This is further classified under two major classifications and numerous individual reserve accounts. The balance in the "Operating Reserves" is \$6,522,159 and the balance in the "Capital Reserves" is \$9,027,642.

The "Operating" reserves are to provide for anticipated future operating expenditures and provided the necessary funds to ensure the County has adequate funds to pay its liabilities without utilizing its line of credit. The main purpose of the General Operating Reserve is to provide for the cash needs of the municipality. Depletion of this reserve would require the utilization of the County's line of credit and the resulting costs would have to be provided in the tax rate.

The "Capital Reserves" are generally to fund planned expenditures in the future and is a prudent financial planning tool so that the tax rate is not spiked in any given year. There are numerous other reasons why the County has established these various reserves. However, this report purpose is to provide information on the uncommitted balances.

The last reserve update report to Council in September indicated that administration was completing various updates to the County allocations under the Gas Tax and MSI Programs which could have a positive impact on the available reserve balances. These reconciliations have been finalized and the attached reserve statement reflects contributions back to the respective reserve.
