Hi Joulia,

Here is a map of the 2 local Natural Areas... as well as a close up of each. Only the Child Lake area is of any value for hay.

Fish and Wildlife along with Environment and Parks are reevaluating the possibility to hay these areas and others given the severe drought situation we are in this year. We are asking clients to please submit an application and we will evaluate on a case by case basis. Those applications that were previously denied will be contacted should the decision change.

Hope this helps!

Subject: Natural areas map

Hi Michael,

Would it be possible to obtain a map showing which lands are designated as "natural areas" with the County? Councillors will be discussing the denials of a couple requests from the locals to hay slough areas on public lands due to these being "natural areas", and a map will be helpful. Thank you

Joulia Whittleton
